INTELLIGENT ENERGY SUPPLY

Now with cost saving & eco friendly charging function via solar panel!

Through the charging circuit in the battery compartment, the Reviermanager RM4eco can be operated with a 6V solar panel and rechargeable 1,2V NiMH batteries AA.
Likewise, operation with the external Reviermanager battery case is possible as with standard AA alkaline batteries.

Solar panel

Advantages of the RM4eco charging circuit:
- low panel costs - The charging electronics are already in the battery compartment of the game camera!
- easy and efficient exchange of the recharge-able batteries (also in the battery compartment)
- movable mount for optimal alignment of solar panel and game camera

We recommend rechargeable Panasonic 1,2V NiMH batteries AA/4 (see picture).

Battery pack
for longer operating time of the camera

COMPATIBLE ACCESSORIES

Metal protective case
effective against vandalism, theft & weathering

External antenna
for signal boosting

Reviermanager PREMIUM-LICENCE
reduction of the trigger interval from 10 to approx 3 minutes by movement

REVIER MANAGER

Game Camera RM4*eco*

KEEP AN EYE ON YOUR TERRITORY

The highlights of the Reviermanager game camera:

- **ALL IN ONE PACKAGE**

  The Reviermanager game camera is not just a game camera with image transmission, but a complete package consisting of a very high quality game camera, a user friendly and versatile smartphone app as well as an annual licence which includes the transmission of all images within one year (no ongoing or hidden additional costs)*.

- **USER-FRIENDLY SMARTPHONE APP**

  For Apple iOS, Android and web version.

- **PLUG & PLAY**

  Insert the batteries, switch on the camera, install the Reviermanager app, register and get started.

- **MOBILE NETWORK**

  In Austria the camera uses the A1 network** by default, in all countries within the EU as well as in Switzerland, Norway, Serbia, the United Kingdom and North Macedonia the best available network is used. And at the same rate!

- **AUSTRIAN QUALITY PRODUCT**

  With personal support & German and English speaking service team.

With these outstanding features, the camera can be used in a energy autonomous way for nature and territory control, as well as for the surveillance of buildings, timber yards, etc. in the private & commercial area.

*No running or hidden additional costs!
**Roaming in all networks of Austria now by special SIM cards also possible! Please contact the specialized trade or our Reviermanager service hotline.

FUNCTION OVERVIEW

The Reviermanager game camera triggers an image at night with adjustable invisible IR flash when motion is detected or manually via the app.
Current information and events are displayed on the mobile phone via push notifications including a preview image.
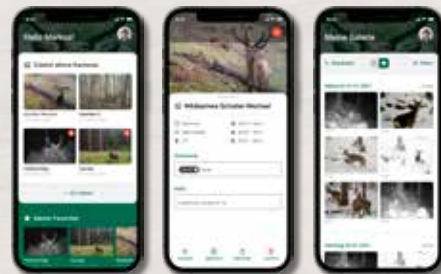

Each image is compressed and sent to the Reviermanager App via LTE, UMTS or GPRS. The transmitted images become available in the Reviermanager App gallery with additional information (weather data etc.) and can be managed there.

- clearly sorted by date
- with current weather data for each image (according to camera-location).
- pictures can be shared via WhatsApp/Facebook/etc...
- mark images as favourites
- automatic deletion of the images
  - after an adjustable period of time (favourite images remain saved)
- filter by various criteria (e.g. by camera)
- notes/tags can be added

REVIERMANAGER APP 2.0

The Reviermanager App 2.0 is available for download for free. The ongoing improvements and the convenient functionalities make it the digital multitool of the hunting world.

DETAILED DISTRICT & STATUS OVERVIEW

- last active cameras
- images marked as favourites
